

### Need:

1. Coffee Can (or any container of similar size)
  2. Tree branch(es)
  3. Rocks
  4. Green and brown construction paper
  5. String or thread
  6. Print out leaf shapes template
- Place a tree branch (or several, depending on the size) in a large can filled with rocks so that it stands up. Use green or brown construction paper to wrap around the can, creating the trunk.
  - Cut out leaf shapes from construction paper, or any type of paper. An alternative is to have the child trace the shape of their hand on different colored paper, or white paper and color each hand a different color - using the hands as “leaves”
  - From the list made of what we offer by being different, write each word on a leaf.
  - Use pieces of string for hanging “leaves” from tree branch.
  - Ask children what they love about the differences.
  - If a coffee can is not available, you can also tape them to the tree poster.
